Clean Orchestration Overview

RetainIQ™ ARO — Clean Orchestration

IBM

IBM Watsonx AI Agents Orchestration Hackathon

The Challenge

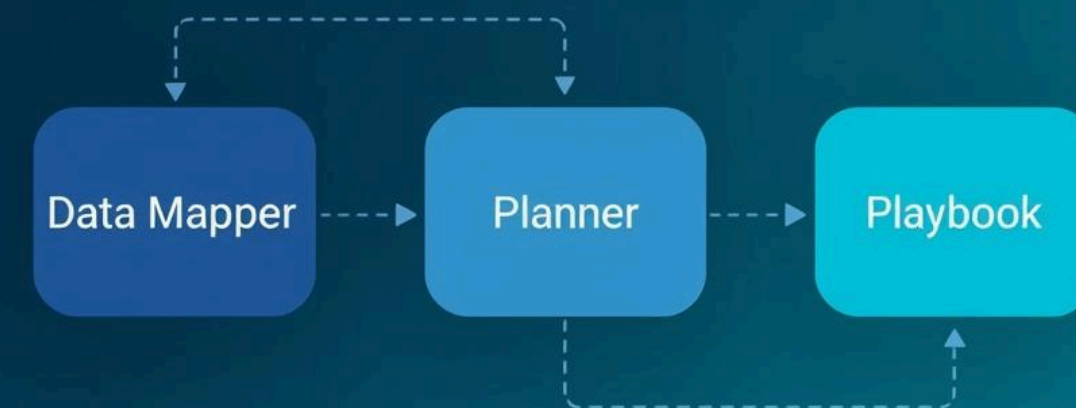

Customer retention data is often fragmented, leading to inefficient processes and wasted resources in SaaS teams.

Solution Overview

RetainIQ™ ARO utilizes **three interconnected AI agents** to streamline data processing and enhance retention strategies effectively.

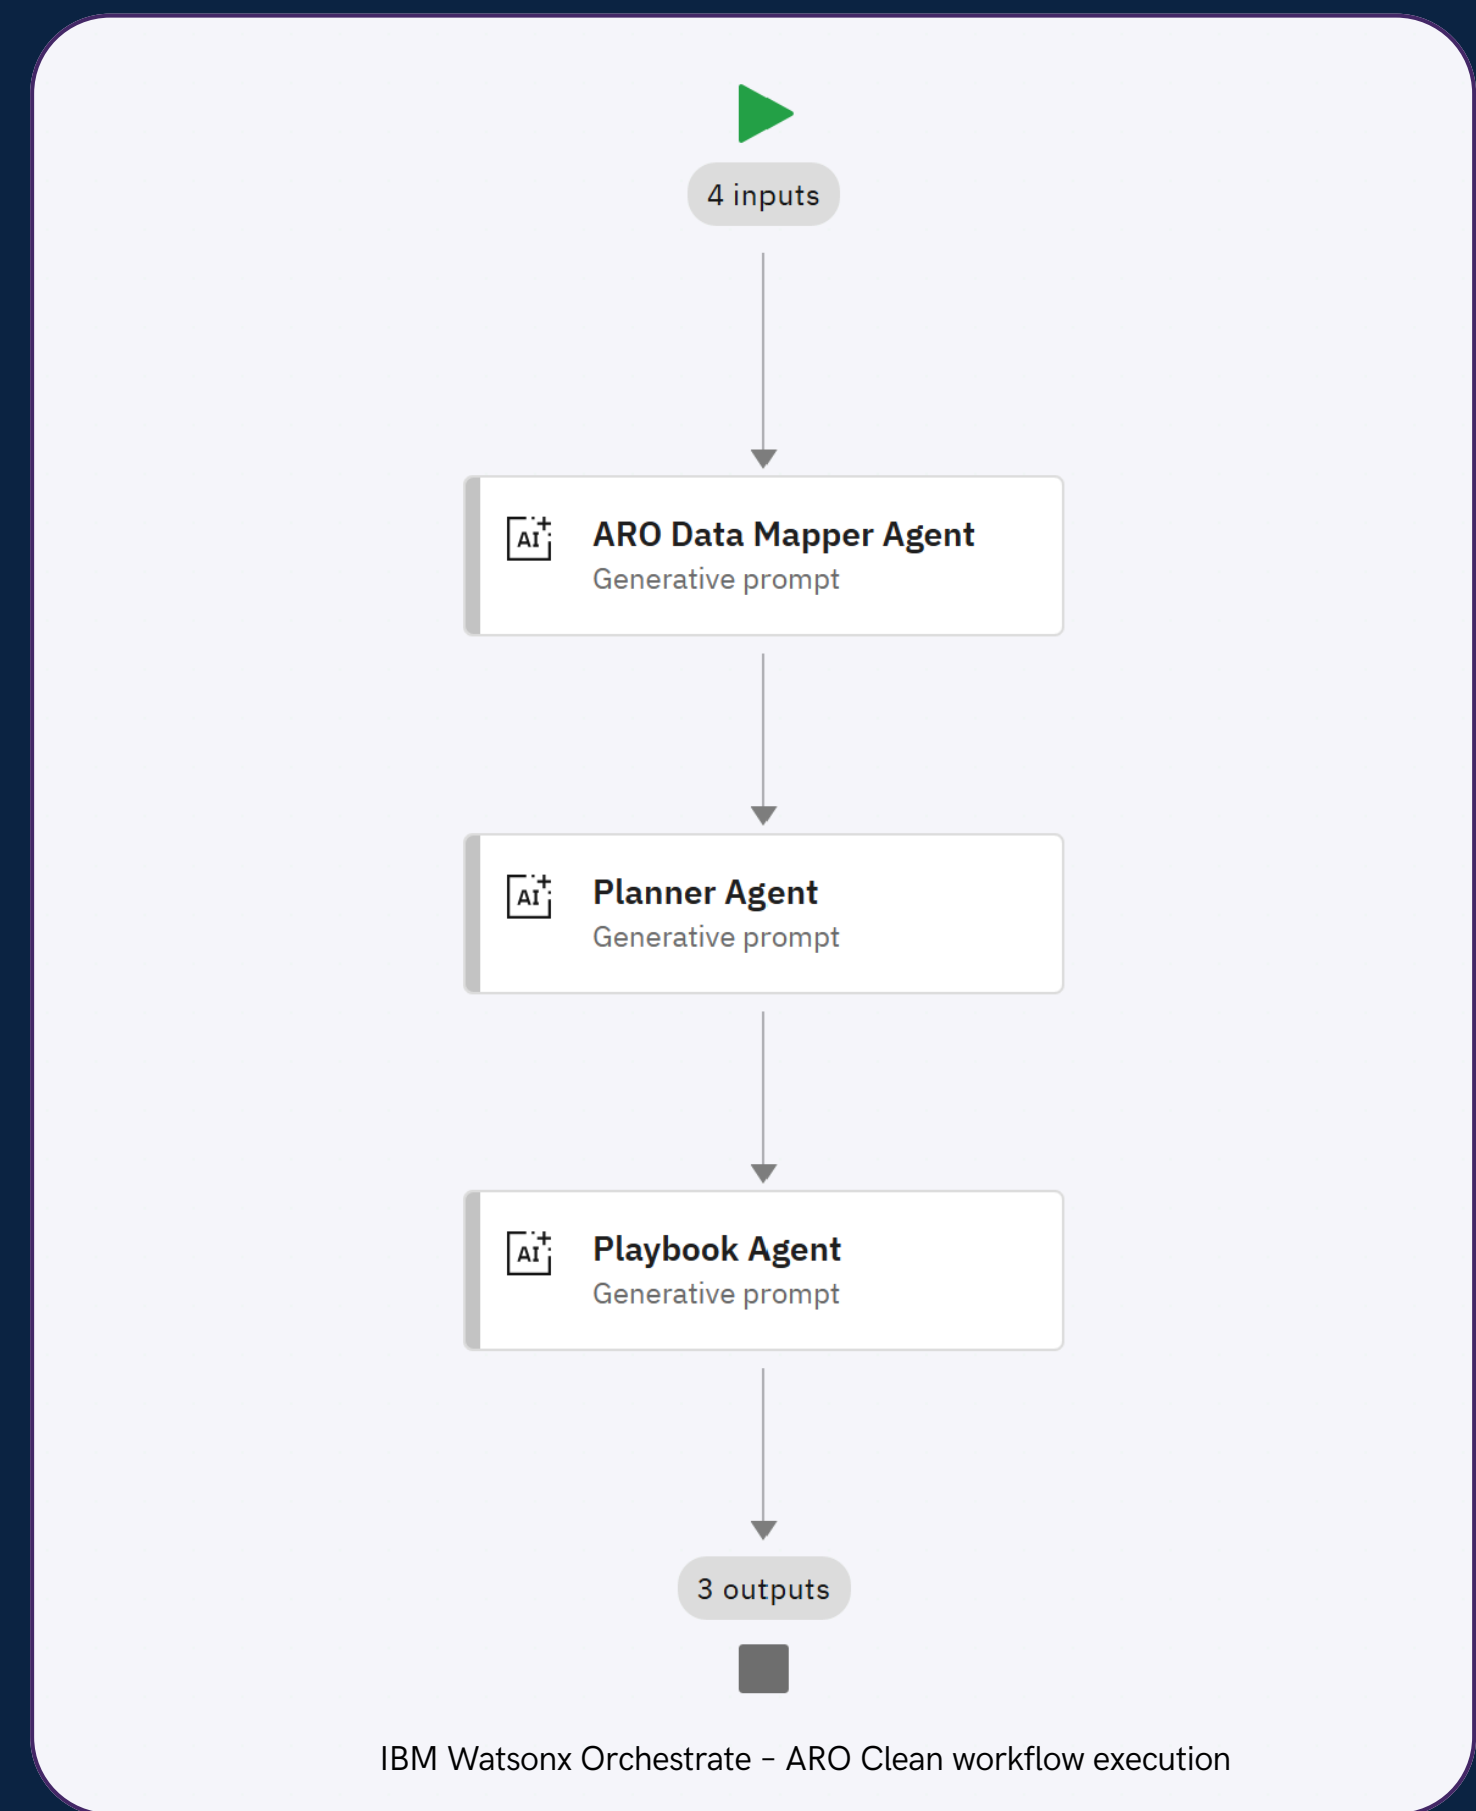

Sequential agent orchestration from data mapping → planning → playbook generation.

Live Demo

Explore **the seamless orchestration** process, showcasing how our agents collaborate to produce verified outputs effectively.

Innovation & Impact

The RetainIQ™ ARO model showcases **transformative agentic orchestration**, enhancing efficiency and adaptability in data automation across various SaaS platforms.
